Professional Scrum Master I CERTIFICATION

The Professional Scrum Master I (PSM I) Certification enables individuals to demonstrate a fundamental level of Scrum mastery - understand Scrum as described in The Scrum Guide, how to apply Scrum in teams, and to adopt consistent terminology and approach to Scrum.

What does the PSM I Certification Cover?

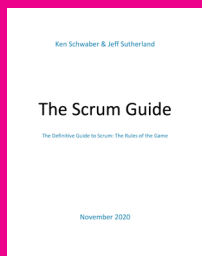

Our PSM I course provides an objective overview of Scrum Master best practice so you can learn how it should be applied. You'll get insight into what makes a successful Scrum Master, learning about the tools and tips you can rely on to improve your effectiveness and output in a Scrum environment.

However, your learning won't get stuck on the page - we believe in providing hands-on Scrum training that you will be able to use straight away.

Our approach to Scrum training uses group discussion combined with practical hands-on exercises and case studies, helping to build your knowledge and develop your skills in applying Scrum methods and tools to the real live working environment as well as being able to pass your exam.

Our accredited course covers the following topics to prepare you for your exam:

- Why Agile?
- Agile History
- Roles and Responsibilities
- Mastering Scrum Artefacts
- Events
- Applying Scrum

KEY TEXT: The Scrum Guide

A truly engaging and informative two-day training course. The whole of the two days were very well structured and the trainer was first rate! A collaborative and entertaining way to learn - plenty of hands-on activities, discussions and Q&A sessions that provided an incredible underpinning of the Scrum Guide and its application in real life. 5 stars!!

Our Virtual Course platform delivers accredited and certified training, led by leading subject matter experts, direct to your home, mobile, computer or office without the hassle of travelling or staying away. It is so easy to fit in an online class into your busy schedule; simply log in from home, the office, or even while you are travelling.

Students can ask questions using a headset, webcam, or a chat window, and have their questions answered, just like in a traditional classroom. Questions can be lined up and answered at intervals without interrupting the teacher's flow of thought. There is no difference in the level of interaction – in fact, distractions are significantly reduced because of this way of teaching.

If you have a group to train, we have a structured programme in place to ensure everyone gets the most out of the course. We offer a managed service where we can provide regular reports on learners' progress and share quiz results to ensure only those that are ready are put forward for the exam.

The Training materials and format were interactive and engaging along with the trainer's role play which was fun whilst getting key points across.
